EDUCATION

Vellore Institute of Technology, Bhopal

B.Tech in Computer Science Engineering (Artificial Intelligence & Machine Learning)

Bhopal, India

2023 – 2027

EXPERIENCE

Ethara AI

Remote

LLM Post-Training Intern

Mar 2026 – Apr 2026

- Audited **LLM** outputs against structured evaluation frameworks to hunt down hallucinations, logical errors, and edge-case failures in model behavior.
- Iteratively steered model behavior through **prompt engineering** and experimentation, using a hypothesis-test-analyze loop to spot and correct inefficient or incorrect outputs.
- Collaborated cross-functionally with engineers and stakeholders under tight timelines, communicating technical findings clearly to ship high-quality, production-facing outputs.

Bharat Heavy Electricals Limited (BHEL)

Haridwar, India

Full-Stack Developer Intern

May 2026 – June 2026

- Designed a **relational database schema (SQLite/PostgreSQL)** and built **React** UI layouts on top of a **Node.js/Express** backend for the Smart Material & Inventory Management Platform (SMIMP) – live at [bhel-project-gray.vercel.app](#).
- Designed and built a **predictive forecasting engine** into the backend to model material demand from historical data, exposing it to the frontend via **REST API** endpoints.
- Owned the system end-to-end – schema design, API design, and UI – independently translating stakeholder requirements into shipped, working features.

PROJECTS

AI-Powered Finance Management Platform | *Next.js, React, Prisma, Supabase, Tailwind CSS* Dec 2025 – Jan 2026

- Built and shipped a full-stack **AI-powered** personal finance app end-to-end, from database schema to deployed UI, to help users track spending and budgets.
- Designed the relational schema and implemented authentication and backend workflows on a **Postgres (Supabase)** data layer via **Prisma ORM**, owning the system across the stack independently.
- Designed features that turned raw financial data into actionable, AI-assisted spending insights and recommendations.

Credit Card Approval Model | *Python, TensorFlow, React, Flask, Scikit-learn*

May 2025 – Jun 2025

[\[GitHub\]](#) [\[Live Demo\]](#)

- Trained and evaluated multiple **ML models** on financial applicant data to drive automated **risk-decisioning** predictions, identifying the key factors behind approval outcomes.
- Built and deployed a full-stack decision-support system end-to-end, pairing a **Flask REST API** backend with a **React** dashboard for real-time predictions.
- Shipped a live, publicly accessible demo on GitHub, taking the project from data to a working deployed product with an open, reviewable codebase.

Stock Market Trend Predictor | *Python, TensorFlow, Pandas, NumPy, Keras*

Apr 2025 – Jun 2025

[\[GitHub\]](#) [\[Live Demo\]](#)

- Built an end-to-end forecasting system using **LSTM** models on live **yFinance API** data to predict market trends.
- Experimented with multiple forecasting architectures, evaluating performance against historical market data.
- Deployed an interactive **Streamlit** dashboard, shipping the model as a usable, live analytics tool.

SKILLS

Languages: Java, Python, JavaScript, SQL

CS Fundamentals: Data Structures & Algorithms, Object-Oriented Design, Complexity Analysis

Database Literacy: SQL (PostgreSQL, SQLite) & NoSQL (MongoDB), REST API Design

AI Edge & Data Science: AI-Assisted Development (Claude, Antigravity), Prompt Engineering, LLM Evaluation & Error Analysis, Predictive Modeling & Forecasting

Full-Stack: React.js, Node.js, Express.js, Flask, FastAPI, TensorFlow, Keras, Scikit-learn, Pandas, NumPy

Tools & Workflow: Git, GitHub, Postman, VS Code, Streamlit

EXTRACURRICULAR ACTIVITIES

- **Core Team (Design & Content), GDGC VIT Bhopal** – collaborated with a cross-disciplinary, multi-person team to organize technical events and lead developer community initiatives.
- **Marketing Intern, Ekatva Foundation** – supported fundraising campaigns and outreach initiatives.

CERTIFICATIONS

Java Foundation Associate – Oracle 

Applied Machine Learning in Python – Coursera
