## SUMMARY

Pre-Final Year B.Tech undergraduate in Artificial Intelligence and Machine Learning at VIT Bhopal University. Strong foundation in Python, machine learning, full-stack development, and data analytics. Experienced in developing real-time web applications, implementing ML algorithms, and participating in open-source programs and hackathons. Currently enhancing problem-solving skills through Data Structures and Algorithms in Java. Passionate about building innovative, data-driven solutions and continuously expanding technical expertise.

## TECHNICAL SKILLS

**Programming Languages:** Java, Python, JavaScript

**Web Development:** React, MongoDB, Node.js, Express.js, HTML, CSS, JavaScript

**Machine Learning Frameworks:** TensorFlow, Keras

**Libraries & Tools:** NumPy, Pandas, Scikit-learn, Matplotlib, Git, GitHub

## PROJECTS

### AI-Powered Finance Management Platform

December 2025 – January 2026

*Full-Stack Web Development Project*

*Next.js, Supabase, Prisma, Clerk, Tailwind CSS, Shadcn UI, Inngest, ArcJet*

- Developed a full-stack AI-powered finance platform to track, analyze, and optimize personal spending with real-time insights
- Built a responsive and accessible UI using Next.js, Tailwind CSS, and Shadcn UI with modular architecture
- Implemented secure authentication, database operations, and event-driven workflows using Clerk, Supabase, Prisma ORM, and Inngest

### Credit Card Approval Model

May 2025 – June 2025

*Machine Learning Project*

*Python, React, Tailwind CSS, Pandas, TensorFlow, NumPy, Scikit learn*

- Engineered a predictive system to automate credit approval decisions using applicant financial and demographic data
- Implemented logistic regression and decision tree classifiers for accurate predictions
- Designed and integrated a web-based interface using Flask, React, and modern web development libraries for real-time user input and results display

### Stock Market Trend Predictor

April 2025 – June 2025

*Machine Learning Project*

*Python, Pandas, NumPy, Keras, TensorFlow, Scikit-learn, Matplotlib, Streamlit, yfinance API*

- Engineered a predictive model to forecast stock price trends leveraging historical market data and statistical features
- Optimized machine learning pipelines by applying Linear Regression and Random Forest algorithms for high-accuracy predictions
- Architected and deployed a full-stack web application integrating Flask, React, and data visualization libraries for dynamic, real-time stock trend analysis

## CERTIFICATIONS

- NPTEL Cloud Computing – IIT Kharagpur
- Google Cloud Vertex AI SkillBoost
- Java Foundation Associate – Oracle
- Machine Learning – Google Developers
- Data Science and Analytics – HP Life
- Generative AI – LinkedIn Learning
- Fundamentals of AIML – Vityarthi
- Python Essentials – Vityarthi
- MATLAB Coding Ramp

## EDUCATION

**Vellore Institute of Technology, Bhopal**

Bhopal, India

*B.Tech in Computer Science Engineering - Artificial Intelligence and Machine Learning*

2023 – 2027

**BML Munjal Green Meadows School**

Haridwar, India

*Higher Secondary Education (CBSE)*

2023

**BML Munjal Green Meadows School**

Haridwar, India

*Secondary Education (CBSE)*

2021
